

World Champion

"Weltmeister – Design Deutschland im Haus der Gegenwart" (World Champions – German Design in the Contemporary Home). During September 2006, approximately 150 everyday objects that set new standards in German and international design, were on exhibit in this home. The showpiece was the innovative bulthaup b3 kitchen system with the monoblock.

bulthaup was chosen for the "Haus der Gegenwart" (Contemporary Home) project because of its architectural and design credentials and its innovation leadership. The cuboid effect of bulthaup b3, its handle-free design and its discreet plinth reinforce the sculptural quality of the room.
