

bulthaup b3

The seamless bulthaup laminate monoblock, just like its forerunner in stainless steel, features flawless, top-quality manufacturing and is planned as an individual piece based on the customer's personal wishes.

The homogeneously solid core laminate ensures a seamless continuation of the worktops, side panels and back panel. The result is a sculpted monoblock that looks as though it was all made from a single mold.

bulthaup

The perfection of the finish and the skillful composition of the high-quality materials form the basis not only for the quality and functionality of the bulthaup monoblock, but also for its sensory appeal.

The bulthaup monoblock can be planned in line with the architectural conditions, as an island, with or without rear panel, as a peninsula or in front of a wall.
